

AIR-BLOCK[®]

GT-AL5

Brushed aluminum floor grommet

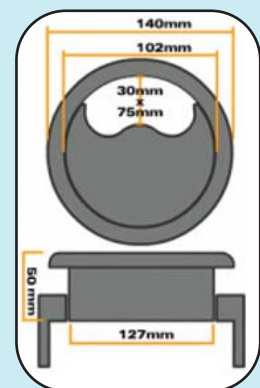

Finally! A high performance engineered grommet with the look architects and designers want!

Designed for installation in prestigious office and foyer areas the GT-AL5 aluminium floor grommet combines both strength and aesthetic functionality. The two part grommet (outer ring and lid) has an overall top surface diameter of 140mm and fits a floor opening of 127mm diameter. The rotatable top cover can be adjusted from 32mm x 75mm to a fully closed position. Two integrated clamping arms firmly hold the grommet in place and a lid earth strap links lid and outer ring to prevent the lid from being dislodged or lost. The grommet is supplied with an additional earth lead to link to the raised floor system. A lid locking screw restricts unauthorised removal of the grommet lid and an EDPM gasket provides an additional cable seal along the cable mouth. The grommet can be converted to a mini floor outlet by attaching a power/data plate and back box to the base of the grommet.

Air-Block[®] GT-AL5 features:

- Heavy Duty Die Cast Aluminum Construction
 - 225kg load capacity
 - Easy installation utilizing (2) clamping devices
 - Fits into a pre-cut 127mm circular cutout
 - EDPM fire rated gasket for Air Seal
 - Finishes: Natural clear anodized aluminum
- (other colours available on request subject to economical quantities)
- Certified air leakage test data available

Gromtec Europe has supplied cable grommets and flooring accessories for over 15 years. Our products are installed in projects around the world. All our units are typically available from stock for immediate delivery.
