

AIR-GUARD[®] KIT

GTAG6

Environmental control made simple

**AIR-GUARD[®] awarded
"PRODUCT OF THE YEAR"
in 2006 by SearchDataCentre.com
in the category Data Centre Cooling**

The GTAG6 Air-Guard[®] cable seal is "the cool choice" for sealing cable openings in the raised access floor and eliminating data room by pass air.

Sealing around cable openings offers the following benefits:

- Reduced air loss and increased under-floor static pressure.
- Improved cooling efficiencies and extended cooling equipment life.
- Dramatically reduced plant running costs. Over 50% of conditioned air does not get to the air intake of data room equipment due to unsealed openings.
- Facilitates Cold/Hot Aisle best practice.
- Eliminates by pass air.

The GTAG6 Air-Guard[®] features:

- 2 compartment color coded cable way (data/power segregation).
- Air-Guard[®]'s unique overlapping better seal brush system.
- Brush and frame are made in flame retardant material. V0 rated.
- 2 piece slide open/close frame for easy access.

The GTAG6 dimensions:

- Overall dimension - 225mm x 170mm.
- Center panel cut out - 185mm x 127mm.
- Edge of panel cut out - 185mm x 145mm.

Gromtec Europe has supplied cable grommets and flooring accessories for over 15 years. Our products are installed in projects around the world. All units are typically available from stock for immediate delivery.
